

Study program: Physical Education and Sport				
Type and level of studies: Basic academic studies				
Course title: THEORY AND TEACHING METHODS OF PHYSICAL EDUCATION 1 (part 2)				
Lecturer or lecturers (for lectures): Milanović T. Ivana, Radisavljević Janić V. Snežana, Lecturer / Associate (for practice): Milošević J. Vladimir				
Course status: Obligatory				
ECTS: 4				
Condition: -				
Course objectives: to develop theoretical basis and skills related to the teaching methods of physical education needed for internship in schools and as a foundation for successful mastering of this subject at the fourth year of the studies.				
The outcome of the course: This course will contribute to the students' development of the theoretical basis in PE teaching and thus prepare students for introduction of more complex theoretical and skill knowledge through the subject "Teaching methods of physical education 2" (fourth year of the studies). The students will acquire basic knowledge, teaching skills and experiences of PE instruction in junior primary school. Students will be prepared for pedagogical practice in the seventh and eighth semesters.				
Course description: <i>Theory teaching</i> Theory teaching provides knowledge about the system of physical education (basic elements of the theory and methods of physical education), knowledge about physical education as a professional activity and academic discipline. The contents of the course include important theoretical bases and teaching methods of physical education necessary for application in primary school settings in physical education. <i>Practical classes:</i> Teaching methods of physical education - operational aspects with elaboration.
