

Study program / study programs: Sport and recreation
Type and level of studies: Special professional studies
Final papers: MODULE WELLNES
ECTS: 13
Condition: all exams passed, ie 47 ESPB points achieved
<p>Final paper objectives: The goal of the final, specialized paper on vocational studies is to give the student the professional maturity in performing the competencies he attains at the end of the studies. By completing the work, a student should show the level of professional maturity that relates to the adoption and application of knowledge acquired during the course of studies, in which he demonstrates the ability to link different knowledge acquired during studies in the context of the problem to which the final work relates. The goal of the final paper is to point out the student's ability to articulate a problem of interest for professional competence in cooperation with professors. The paper should also show the maturity of the student, in writing, using the appropriate methodology, elaborates the problem of the work, as well as the ability to write professional papers. With the final paper, the student proves that he has mastered the technique of monitoring professional literature and is able to logically use it in his own professional development.</p>
<p>Final paper outcome: The student who defended his/her final paper shows that he/she has mastered the competencies in the area of the selected professional specialist module and that he/her is able to apply the experience gained within his work in immediate practice.</p>
<p>General facilities: The final paper represents the professional work of the student, which refers to the area of the selected professional specialist module. The work of the student is in writing, which must be a coherent unit that clearly identifies the theoretical approach, problem, objective and appropriate methodology. The conclusions of the work must arise from the elaboration of the problems and the results obtained; the use and review of the literature must comply with the applicable methodological criteria.</p>
